

A LITTLE FIGURING.

The New York Sun's report of the visit of a delegation from the Peoples' party to Senator Carlisle of Kentucky, is interesting reading. They wanted his views on government ownership of railroad, telegraph lines etc. Senator Carlisle asked: "Do you purpose to get possession of these properties by confiscation?" They answered: "No that wouldn't be fair." The Senator remarked: "Then you must buy them, and to buy them you must pay for them, and to pay for them you must tax yourselves," and then he presented to them the situation in this form: "Have you any idea how much it would cost? Our government debt at the close of the war, was more than \$2,000,000,000, and we have been almost thirty years in paying half of it. The railroads, telegraph, and telephone lines, and steamboats in the country, represent about \$1,000,000,000 invested capital; \$4,000,000,000 is bonded indebtedness, which must be paid. Are you ready to tax yourselves to raise this money? Then after you have got the property, are you ready to tax yourselves to operate it, for the government never succeeded in doing business a profit? Consider another effect; such a plan would add, perhaps, 1,200,000 men and women to the roll of government employees. How would you ever succeed in turning out of power an administration with such resources at its command? The more corrupt it was, the more difficult it would be to displace it.

Nevada.

The people of this State are more prosperous than those of almost any other section of the country and that fact is coming to be known now. Even now in the much boomed section of southern California people are dissatisfied and looking this way. A letter was received by the Board of Trade a few days ago from a gentleman now living in Los Angeles who is desirous of coming to Nevada with a colony of disappointed Easterners who have not found what they were looking for in southern California. This morning's train brought to Reno two or three gentlemen from Modesto, Cal., who are seeking a new field and came to Reno to see what we have here. Mr. Fulton's letters in the New York Tribune are attracting much attention and the Board of Trade are receiving letters of inquiry daily. Hardly a day passes that the Gazette does not receive from one to three letters from people who are dissatisfied with their lot in other places and are anxious to know the truth about Nevada.—Gazette.

The Tuscarora correspondent of the Elko Independent says: Our fellow townsman, R. M. Catlin, has invented, perfected and patented one of the most complete, simple, compact and rapid-firing rifles on earth. By a simple device the magazine, consisting of twelve to sixteen shots, can be discharged more rapidly than any man can count, or the shots can be regulated so as to be fired one by one, slow or fast as may be required. The gun is simple and accurate, at long or short range, and has been tested over three thousand times in the last few days without a failure in any particular. The penetration of the projectile is equal, if not superior, to any fire arm yet brought out, and the range so far tested is from five hundred to one thousand yards. If there is any gun on earth that can beat this I should like to hear of it.

All the talk of a \$25,000 match between Sullivan and Slavin is bosh. Sullivan is a back number, and no one would ever consent to train him for another match. Killrain was sick when he whipped him at Richburg. Even then it took 72 rounds to do what Slavin accomplished in nine. Sullivan could hardly lick poor Joe McAuliffe now.
